

Dairy Sustainability Framework

REPORTING SECTOR PROGRESS SINCE 2013

Live Spanish interpretation will be available!

2024 DSF Webinar Programme

Date	UK Time	Topic & speaker	What's the webinar covering?
12 March 2024	19h00 – 20h00	Towards sustainable food systems – understanding the nutrient contribution of dairy <i>Andrew Fletcher, Fonterra & Riddett Institute</i>	Food systems exist to provide nutrition, and one which fails to provide sufficient nutrition can never be sustainable. Before we begin talking about making radical changes to food systems or diets, it is important we understand the nutrient contribution of different elements of the system. This talk will highlight work from the Sustainable Nutrition Initiative with a particular focus on the contribution of milk and dairy to global nutrition.
14 May 2024	20h00 – 21h00	Project Proteos: The importance of high-quality protein in sustainable diets and what this means for dairy <i>Dr Mitch Kanter, Senior Technical Advisor GDP</i>	A recently concluded six year study, Project Proteos, looked at developing a more reliable way to measure protein quality in foods. In this webinar, Dr Mitch Kanter, will give an overview of the project, the implications of the data on assessing protein quality of foods and the potential next steps.
17 July 2024	20h00 – 21h00	Animal welfare's place in the sustainability puzzle <i>Haley Grimes, Director Farm Program Operations, American Humane & Member of the DSF Advisory Council</i>	Working across a range of farm animal species, Haley will talk about the changing animal welfare requirements for livestock production, and how the industry can work collaboratively to navigate these changes and ensure a secure food supply in the future.
18 September, 2024	20h00 – 21h00	Evaluating the social impact of dairy <i>Ernesto Reyes, GDP Sector Lead for Dairy Development at IFCN Dairy Research Network Center & Member of the DSF Advisory Council</i>	The webinar will outline the social role that dairy plays in different economies in terms of rural development, and its contribution to meet the UN agenda (Social Development Goals).
14 November 2024	19h00 – 20h00	Exploring the research component of Pathways to Dairy Net Zero <i>Professor Richard Dewhurst, Global Research Alliance on Agricultural Greenhouse Gases (GRA) and Head of SRUC's Dairy Research Centre</i>	This webinar will explore the research component of P2DNZ, which is working to identify practical pathways for dairy systems worldwide. Professor Richard Dewhurst will explain the science that quantifies GHG Emissions from global dairy. His talk will discuss the emissions profiles for the different dairy production systems, the mitigation opportunities and critically the impact the cumulative emissions for the different GHG gases have on global warming.
